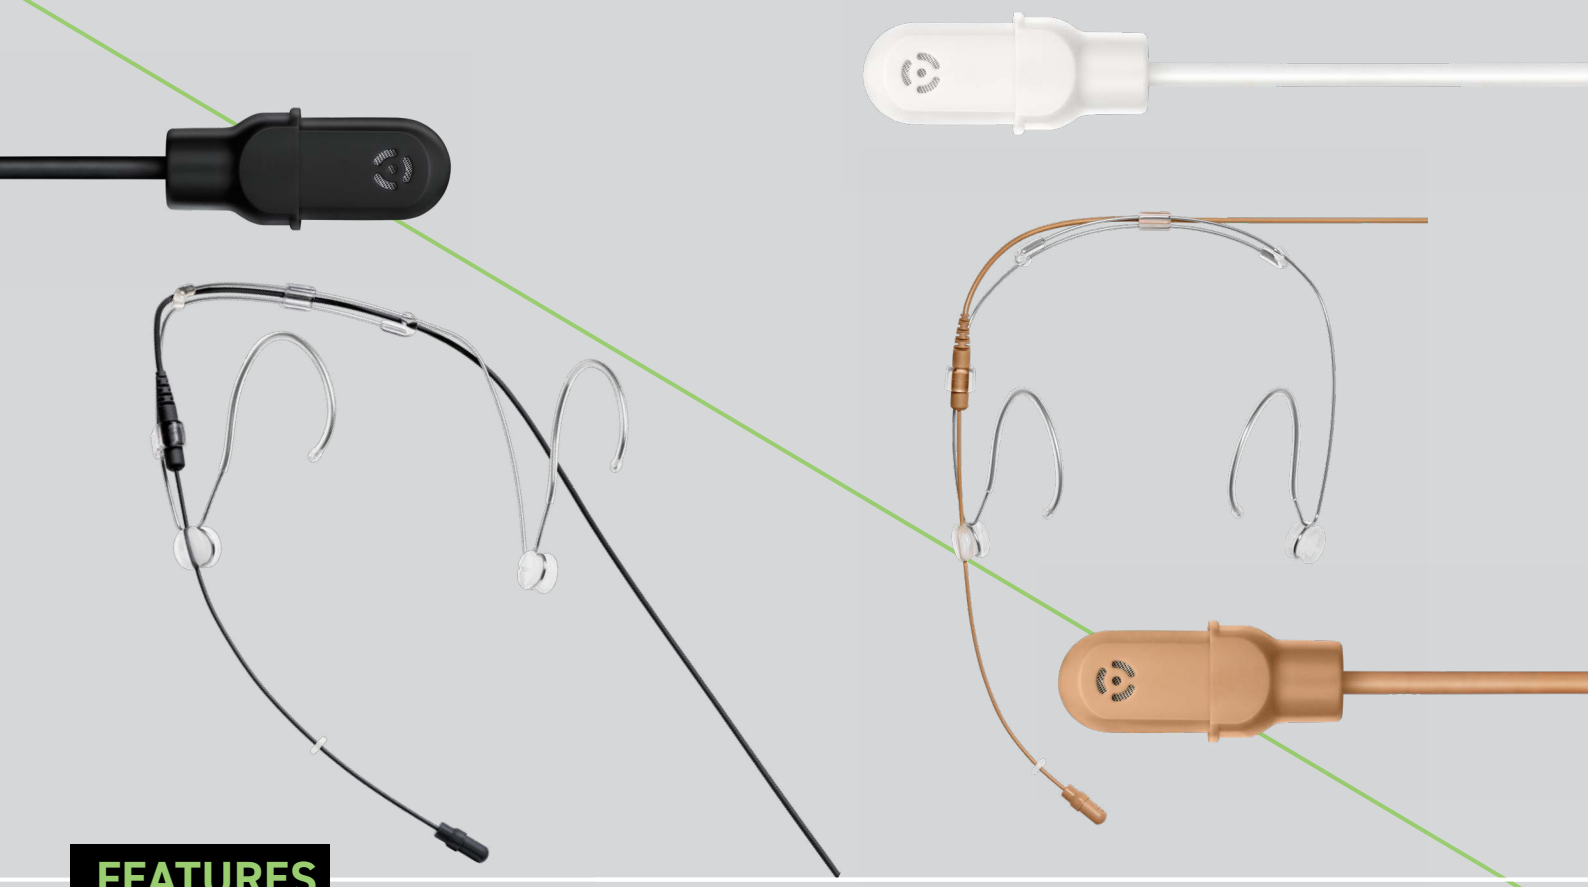
DURAPLEX OMNIDIRECTIONAL WATERPROOF SUBMINIATURE MICROPHONE

DEFY THE ELEMENTS.

Available in lavalier or headset form, DuraPlex has been extensively tested to ensure an IP57 dust-resistant, waterproof rating*. Whether shooting reality TV, mounting a professional theatrical tour, or wherever audio takes you, contending with the elements won't slow you down. As comfortable on the beach as it is in a broadcast studio, DuraPlex features a neutral, full sound quality that lives up to the highest audio standards.



FEATURES

- 5 mm omnidirectional subminiature microphone available in lavalier or headset form
- IP57 dust-resistant, waterproof rated
- Neutral, full sound quality for film, broadcast, speech, theater, and performance applications

  - Dual redundant ground in cable serves as secondary shield for unprecedented longevity
  - Immune to memory effect and kinks
  - Fully paintable with typical theater paints, pens and polishes
- Presence Cap included for tailored frequency response provides additional vocal clarity and presence (3-4 dB boost near 10 kHz)
- Lavalier available in four colors: Black, Cocoa, Tan, White
- Headset available in three colors: Black, Cocoa, Tan
- Available in two connector types: TA4F (mTQG) and LEMO
- Ships with the following accessories: Case, Foam Windscreen, Snap-fit Windscreen, Single Tie Clip, Sticky Mount (lavalier only), TQG Locking Collar (mTQG/TA4F SKUs only)

**IP Code, published by the International Electrotechnical Commission (IEC), rates the degree of protection against dust (first number) and water (second number). An IP57 rating classifies DuraPlex as follows:*

- *5 (Dust) – Ingress of dust is not entirely prevented, but it does not enter in sufficient quantity to interfere with the satisfactory operation of the equipment.*
- *7 (Water) – Ingress of water in harmful quantity shall not be possible when the enclosure is immersed in water up to one meter for 30 minutes.*
